PERSONAL WORKSTATIONS

When power is designed with purpose, people can focus on what matters most. Dekko's personal workstation solutions bring together intelligent functionality, enduring quality, and elevated design to create workspaces that feel as good as they perform. From customizable power access to premium finishes and seamless furniture integration, every detail is engineered to support productivity, comfort, and connection. Because the best work happens when technology works beautifully in the background.

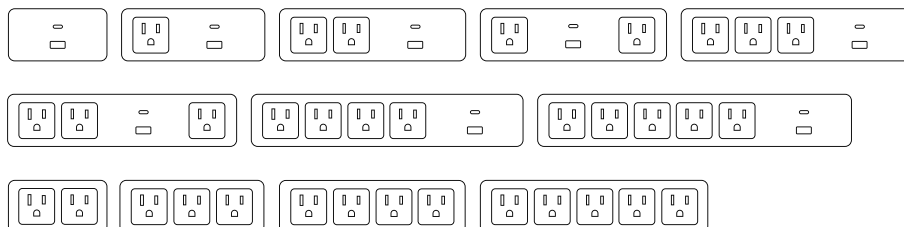

ELECTROLITE™ COLLECTION

Electrolite™ is a breakthrough collection of highly configurable power solutions designed for modern, flexible workspaces. Purpose-built with 360° intentional design, Electrolite™ seamlessly integrates advanced charging technology and sleek aesthetics—delivering dependable, high-performance power without compromising the visual integrity of any environment. Crafted for designers, specifiers, and users who demand more from their workspace infrastructure, Electrolite™ evolves beyond the limitations of traditional, bulky power systems. Whether surface-mounted, in-surface, or under-mounted, each unit is engineered to adapt—offering options for power configuration, receptacle orientation, finish, and infeed that align with both form and function.

ASHLEY™ COLLECTION

Ashley™ offers one of the most complete product lines available on Dekko's single-circuit PURL™ system—every Ashley model is supported. PURL™ connects up to nine power units through a single outlet, eliminating outlet clutter, simplifying installation, and enabling cleaner layouts. With Ashley™, PURL™ makes simple, non-sequential, scalable, code-ready, accessible power possible—power designed to evolve with your space.

ASHLEY™ + PURL™

INTEGRATED POWER SOLUTION

Ashley™ offers one of the most complete product lines available on Dekko's single circuit PURL™ system - with every Ashley model supported. PURL™ connects up to nine power units through a single outlet—eliminating outlet clutter, simplifying installation, and enabling cleaner layouts. With Ashley™ - PURL is the system that makes simple, non-sequential, scalable, code-ready, accessible power possible and designed to evolve with your space.

CONFERENCING & COLLABORATION

Great ideas happen when people can connect without interruption. Dekko's conferencing and collaboration solutions integrate power, charging, and data access directly into the spaces where decisions are made and innovation takes shape. Thoughtfully designed to balance technology, aesthetics, and user experience, our solutions keep teams powered, engaged, and focused on the conversation—not the search for an outlet. The result is a more connected environment where productivity and creativity flow naturally.

PORTABLE SOLUTIONS

Portable power should create freedom, not compromise. Dekko's portable solutions bring power and charging directly to the people and spaces that need it most—supporting movement, flexibility, and collaboration without being tethered to fixed furnishings. Combining sophisticated design, advanced charging technologies, and thoughtfully engineered details, these solutions integrate naturally into modern workplaces, hospitality environments, and shared spaces. Because when power moves effortlessly with people, productivity and connection can happen anywhere.
